

Debugging the Techstore Website Questions

Part 2: Chrome DevTools (Frontend Analysis)

Q1: What is the total **Load Time**?

229 ms.

Q2: What is the new **Load Time**?

17.76 s.

Q3: What is the **Name** of the resource?

Longest: products / Finishes last:

<https://images.unsplash.com/photo-1595225476474-87563907a212?q=80&w=4000&auto=format&fit=crop>

Q4: Name of the missing file:

monitor-404.jpg

Part 4: Logic & Security (Frontend Debugging)

Q5: Which JavaScript object contains confidential info (API Key)?

The console object contains the API key

Q6: Why does the text disappear?

The text does not actually disappear. It becomes invisible because the hover background color is white, which matches the text color, making the text unreadable.

Q7: Is `price` a Number or a String?

String

Q8: Why does "laptop" not match "Laptop"?

JavaScript is case-sensitive, so a lowercase "l" is different from an uppercase "L", causing the values not to match.
